## BACKUP POWER GENERATOR PACKAGE

This package is ideal for a residential home located in areas that experience regular power outages. It provides 3 KW of back up power should the mains power not be available. This would typically be enough to provide power for a regular residential house. As part of this package we provide a new essential services distribution board and a manual generator change over switch, which would provide power to appliances in the house – this means there is an interruption to the power supply whilst the generator is being connected.

NBN modem (to ensure landline phone is operational)	Lights
All power points in the house – allows the use of normal appliances (fridge, freezer, TV, set top box, etc)	Water pump (if required)
	Wifi router

### THE BASE PACKAGE INCLUDES:

- + 1 x 3000W generator
- + 1 x manual change over switch
- + 1 x essential services distribution board

### OPTIONAL EXTRAS INCLUDE

- + Installation
- + Larger generator
- + Automatic transfer switch
- + Extended warranty
- + Maintenance and service packag
- + UPS units for sensitive equipment i.e. computers/tv's

As an option we can also supply an automatic transfer switch which starts the generator automatically on loss of mains power supply.

CDGA Power offer free no obligation site assessments to customize a system to meet your specific needs. We can install your system for you with our qualified and experienced licensed electricians. Generators come with a 1 year limited warranty.

\* Prices are valid until 30 June 2021. Prices include GST. Prices exclude installation and delivery. CDGA Power terms and conditions apply.
