## PORTABLE POWER PACKAGE

This package is ideal for applications where a portable power source is required – e.g. site offices, construction sites, mining exploration or functions. The base package is supplied in a lockable, powder coated steel site toolbox with a 2400 W inverter, a 255 Ah 12V battery and 600W of folding solar panels. 4 x 10A power outlets are fitted for 240V equipment and a supplementary charging point is also provided, should a backup generator be required.

Custom systems can also be designed, including larger trailer mounted or containerised units.

### THE BASE PACKAGE INCLUDES:

- + 1 x Victron Multiplus 2400W 12 volt inverter charger
- + 1 x 12V 255 Ah Deep Cycle Solar PV batteries
- + 1 x charge controller
- + 1 x battery isolator
- + 1 x solar isolator
- + 1 x main isolator switch
- + RCD protection
- + 4 x 240V, 10A power outlets
- + 1 x supplementary generator connection point
- + 600 W of portable solar panels (which can be stored in the site toolbox)

### OPTIONAL EXTRAS INCLUDE

- + Additional batteries to provide longer run time in low sun conditions
- + Higher capacity inverter to allow the simultaneous use of more appliances
- + Additional portable solar panels
- + Fixed solar panels for more permanent installations – i.e. site offices
- + Additional 10A or 15A 240V power outlets
- + A supplementary generator can also be provided
- + Extended warranty
- + Maintenance and service packages

CDGA Power offer free no obligation site assessments to customize a system to meet your specific needs. We can install your system for you with our qualified and experienced licensed electricians. Generators come with a 1 year limited warranty.

\* Prices are valid until 30 June 2021. Prices include GST. Prices exclude installation and delivery. CDGA Power terms and conditions apply.
